

# LOWER DRUG COSTS NOW!

## URGE YOUR CONGRESSPERSON TO SUPPORT HR 3

**W**e all know prescription drugs are vital to the health of our loved ones and those we care for. But drug companies set the prices, which means many of us struggle to afford our medication—even if we're lucky enough to have insurance or Medi-Cal.

That's why we support HR 3, and are calling on the federal government to lower drug prices. It's time to say NO to corporations holding our health hostage for profit!

### HERE'S WHAT YOU NEED TO KNOW ABOUT HR 3, THE LOWER DRUG COSTS NOW ACT OF 2019:

- It requires the federal government to negotiate directly with prescription drug corporations for lower prices for everyone
- Corporations that refuse to negotiate will be forced to pay a steep tax that gets higher each year they refuse
- The negotiated lower prices cannot be more than the average of what other countries like Canada, the U.K., and Japan pay for the same drugs
- For the first time ever, HR 3 sets a \$2,000 cap on out-of-pocket Part D costs for Medicare recipients

**But we need your help!** Congress may change HR 3 to require price negotiations for Medicare recipients only—which means drug companies could still raise prices on the rest of us.

CALL CONGRESS TODAY AND URGE THEM TO  
PASS HR 3 AND LOWER PRESCRIPTION DRUG  
PRICES FOR *EVERYONE*: **1-866-957-9069**
